DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 1, 2008 has been entered.

Response to Amendment

- 2. This Office action is a reply to applicants' communication filed on December 1, 2008 in response to PTO Office Action mailed on November 19, 2008. Applicant's remarks and amendments to the claims and/or the specification were considered with the results that follow.
- 3. In response to the last Office action, claims 1 and 3-8 have been amended.

 Claim 9 has been added. Claim 2 has been canceled. As a result, claims 1 and 3-9 are now pending.

Response to Arguments

4. Applicant's arguments filed December 1, 2008 have been fully considered. The amendment filed on October 30, 2008 overcomes the rejection of claims 1 and 3-8.

Art Unit: 2188

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1 and 3-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1 and 3-9, in particular, claims 1, 8 and 9 recite, inter alias, "a setting unit which sets, to the searched-out cache entry, the caching termination attribute indicating that caching is allowed to be terminated, while said cache memory is not being accessed by the processor" and "wherein storing of the address range in said holding unit is performed according to a data transfer instruction for transferring data to said holding unit". These limitations find no support in the original disclosure and are considered new matter for failing to comply with the written description requirement of 35 U.S.C. 112, first paragraph. The original disclosure simply provides for "while the cache memory is not accessed by the processor, the flag rewriting unit outputs a line address to the address register; causes the comparators to compare the tag address in the address register and the tag of the cache entries; and judges whether or not there is a hit; [page 15, paragraph 0060]", and "an instruction to write a command in the command register wherein the instruction is a normal transfer

Art Unit: 2188

instruction (mov instruction), and specifies the command as a source operand and the command register as the destination operand; Fig. 6C, page 12, paragraph 0049". The foregoing simply does not support the newly added claim limitations pointed out above and thus fail to comply with the requirement of 35 U.S.C. 112, first paragraph.

Additionally, as required by the MPEP, any negative limitation or exclusionary proviso must have basis in the original disclosure. See *In re Johnson*, 558 F.2d 1008, 1019, 194 USPQ 187, 196 (CCPA 1977).

- 7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 8. Claims 1 and 3-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Particularly, the limitations "a setting unit which sets, to the searched-out cache entry, the caching termination attribute indicating that caching is allowed to be terminated, while said cache memory is not being accessed by the processor" render the claims indefinite in that they tend to define the invention in terms of what it is not, rather than pointing out the invention and attempt to claim the invention by excluding what the inventors did not invent rather than distinctly and particularly pointing out what they did invent. *In re Schechter*, 205 F.2d 185, 98 USPQ 144 (CCPA 1953).

Conclusion

9. When responding to the office action, Applicant is advised to clearly point out the patentable novelty that he or she thinks the claims present in view of the state of the art disclosed by references cited or the objections made. He or she must also show how the amendments avoid such references or objections. See 37 C.F.R. 1.111(c).

- 10. When responding to the Office action, Applicant is advised to clearly point out where support, with reference to page, line numbers, and figures, is found for any amendment made to the claims.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mardochee Chery whose telephone number is (571) 272-4246. The examiner can normally be reached on 8:30A-5:00P.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hyung Sough can be reached on (571) 272-6799. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
